AEOLUS
Cosmic Holy Spirit

Through the graciousness of the Cosmic Holy Spirit, Beloved AEolus, we are privileged to release to you this important instruction which He gave through Miss Geraldine Innocente (Lady Miriam) when He held the Office of the Maha Chohan.

You will find this Treatise on various principles of the Cosmic Law most illumining, and your study and meditation upon the Truths herein presented of invaluable assistance to you in your forward progress on the Pathway of Light unto your Victorious Accomplishment in the Light.

The New Age Church of the Christ

CHAPTER I THE ROAD TO BROTHERHOOD

In the evolution of humanity, many God Beings not concerned with the creation and progression of the human race, offer Their life, Their sustained radiation, protection and Cosmic creative powers to cradle the new humanity and its planet until the hour when a self governing body may be raised up from within the race itself. This self governing body is known to the world as The Great White Brotherhood and It is composed, for the most part, of perfected human beings who have chosen to remain as part of the karma and evolution of the planet through love.

The offices are held by Beings Who have fitted themselves through training and momentum to best serve the Cause in that capacity.

The Brotherhood, which, at Its inception, was small in numbers, has increased in Power, Wisdom and Capacity to influence mankind, as more of the peoples of Earth have achieved the victory of self mastery and the Ascension.

The goal and final expression of this Inner Order will be to include every lifestream belonging to the Earth plane, and all of mankind will become a Universal Brotherhood, regardless of creed or color, dedicated in purpose and service to the upliftment of their fellowman.

The Great White Brotherhood forms the model upon which the mass of mankind will build their natures, activities and universal service in the future. It is a way of life instituted by the few, for the benefit of many, and with the coming of the Cosmic Christ this

Universal Brotherhood is ever expanding and extending further and further into the consciousness of men.

Individuals who are privileged to enter into the outer court of The Great White Brotherhood, anticipating their capacity to serve and coming to the fulfillment of their purpose in the Universe—are the blessed ones, who by the use of the Sacred Fire have purified their lifestreams and have awakened to the needs of others.

There is only one way out of the present human consciousness, and that is through the Road of Brotherhood which will become Universal as the New Age proceeds. Every member of the Brotherhood, including the outer, gives the fullness of his Good to the Whole, and each of you is privileged to draw on the momentum of the entire Brotherhood to any extent when you are performing the work and service in Their Name and They not only cannot deny the call of a Brother, but will eagerly rush with the full power of the Light of Their Lifestreams to assist such an one in any endeavor to expand God's Will and Service. The Might of the Universal Kingdom stands at the beck and call of all who would assist in furthering the Father's Kingdom.

Utilize your connection and see the Powers that the Brotherhood can wield for your endeavors to serve the Light, and return this planet and her evolutions to Its God Estate.

CHAPTER II THE MIRACLE OF CREATION

The miracle of Creation is so beautiful because the Godhead allows the development and externalization of His Own Ideas to be the joyous experiences of His Creation, and when the individual finds himself so at One with the Universal Mind that he is constantly about The Father's Business, and consciously nurturing His Ideas, he experiences ecstasy which is the Ultimate and which God in His kindness held back from affecting Himself so that the joy might be that of His children.

When the mind is stilled of thinking and the personality with all its doing for the moment is set aside, the moment of God's opportunity is present, then in a mystic outflow there comes into the consciousness many beautiful and purposeful ideas which are delightful to contemplate, and exhilarating to encompass. This is the experience that the mystic, sage and holy man strive to attain, and in its fullness has been called Nirvana, and in its partial expression—illumination of one type or another. It might appear like the descent in an explosion of thousands of light particles similar to the Roman candles that signify the American and the Chinese holidays. This has been the ultimate, unfortunately, for many, but it is only the beginning of the plan and purpose of being. The few who have been able to return from such an experience and carried those ideas, translating them, even poorly, into food and drink for the masses, have been the saints and sages of the race.

The Mind of God is so filled with concentrated focuses of Light which contain within themselves potential systems of worlds,

with all their intricate designs, is a veritable dynamo of unborn ideas which are constantly radiating, descending on the outbreath of the Logi, and entering into the minds of those Perfected Beings who inhabit the seven spheres, where they become the responsibility and obligation of their receiver, and are developed and externalized according to the free will of the lifestream; but as you could not count the number of electrons in the span of the sky right above you, so could you not count the number of ideas that vibrate through the air and the aether of this Earth. All this has not been claimed because of the very multiplicity and the awaiting the attunement of some mind aware of their existence that they might be externalized.

An individual living and breathing in this sea of ideas, tunes into his own mind to the Will of God, and in Harmony, through the desire and motive to, in some measure, enrich his own environment and the race, becomes immediately magnetically attracted to the ideas which are akin to his sympathy (mutual feeling), and as the bee flocks to honey, so do these ideas draw into the mind of the earnest lifestream desirous in some measure of increasing his understanding; his wealth; his health; his planet; his people.

When these ideas enter the mind, they must be recalled, and fed with the substance of feeling that they may become manifest. The emotional body must be sufficiently interested in order to pour its life and energy into the idea until the externalized manifestation is present on the screen of life.

Many people who receive these beautiful ideas are too mentally lazy to recall them, or emotionally lethargic to feed them rhythmically until form ensues. An experience that will be apparent as you pursue this instruction is--that an idea of a perfect nature will, if

entertained, bring many of its kind, and this forms a family, or an entire community in itself, for 'like attracts like' in the mind world, in the feeling world, and in the physical world.

CHAPTER III THE COSMIC CATHEDRAL

Just as homes and temples were created to protect mankind from the harsh aspects of the elements and enabled them to sustain the physical instrument in which he functions, so has a great invisible Cathedral been formed over the entire human race by the strong and collective thought and feeling forms of individual intelligences, who, of their own sweet will and desire to protect the soul life of the people from the winds of the psychic and astral forces, which blow hither and thither, desirous of extinguishing all thought and feeling of a good and progressive nature.

This Cosmic Cathedral has been the Guardian Wall, and it is said that it is made up of the living bodies of the Saints, Masters, the Angelic Host, Solar Lords, Avatars and the Shining Presences of good and selfless men and women. It is also made up of the thoughts and feelings, the prayers and the devotions that have been offered for the impersonal good of the race and this Cosmic Cathedral holds back over fifty percent of the accumulation that would otherwise return and be a pressure upon practically every lifestream upon the Path of evolution and progress.

In this present day when Earth conditions seem so uncertain, and the lifestream of the race are so chaotic and disturbed, it is difficult to believe that there is a great Cosmic Fane between mankind and evil, but I can assure you it is but a small percentage of the accumulated evil to which mankind are by nature heir, that finds its way through this great Guardian Wall.

The more individuals that We can secure to assist Us in

holding this mighty Wall around the race, the less of this evil can be manifested, and by Our calls there comes a wave of the Cosmic Love and Light that will melt away a great percentage of this effluvia before it can spend itself over the lives of its creators.

In contemplation, feel your strong thought and feeling a part of this shield, holding back the accumulation of the masses and then use all your invocative powers in calling for that Forgiving Flame of Mercy to hold back all that is behind the shield, that it might never know expression.

CHAPTER IV THE GROWTH OF PLANETS

Blessed People, since you are intelligent, valuable co-workers with Us, I am going to speak with you about the growth of planets and stars.

Your vision must be broadened in order to comprehend and enlighten the intellectual consciousness so that you may understand the so-called 'mysteries' of interstellar space, but suffice it to know that the growth, expansion and unfoldment of beauty and glory is the Law that doth govern every Universe in every Galaxy throughout creation. There is no such thing as a static expression of Life, and the stars and suns and planets, by the natural law of their being, with every beat of their Cosmic hearts, expand their auras and sphere of influence to a greater extent in the Solar System. Just as a small infant stretches his arms and legs to ensure body growth, so do the great Cosmic Planetary Lords expand the Cosmic Substance by Their Breath, intensifying and increasing the luminosity of Their particular focus in whatever Galaxy They are expressing.

Now, the great Minds that create a Universe know neither time nor space, and these great God Focuses that you see in the sky are fluidic, in so far as the expansion of the whole Solar System knows and is aware, that a certain elasticity in unfoldment, and the corresponding System automatically unfolds and cooperates in like proportion so that there is no such thing as accident of confusion in its spirit growth.

Now concerning the smaller sphere (Earth), there are ten billion lifestreams who are dedicated to the task of emitting electronic

light substance from their bodies, and if their breath was sent forth in a natural, harmonious and orderly sequence, it would increase the Light of the Earth in a manner to correspond with the other planets of the system, as well as the expansion and growth of the Galaxy to which we belong. If this electronic Light had been sent forth uncontaminated by these ten billion souls, coupled with the constant outpouring of the Gods, as well as the physical Sun and the Channels of Light that serve the Universe, it would have made a shining orb of this planet many centuries ago. However, human beings did not choose to obey the Light governing their Galaxy belonging to this scheme of creation, and the Substance of God's Life released to their bodies, and when emitted, instead of being Pure Electronic Light it became a film or cloak of shadow on the surface of the Earth which has been tolerated by an overly-patient Hierarchy for many, many centuries. The Great Intelligences that govern this planetary scheme have now agreed *THAT THE EARTH MUST, OF NECESSITY, ASSUME HER PROPER PLACE IN OUR SOLAR SYSTEM AND EMIT THE LIGHT WHICH IT HER RESPONSIBILITY TO OFFER TO OUR GALAXY.*

The ten billion lifestreams are now *HELD ACCOUNTABLE* to fulfilling their part in the destiny of the whole and, *THERE IS NO ESCAPE FOR EVEN ONE.* There is not only a balance to be met in the Universal record, but there is a *SERVICE THAT THE EARTH MUST PERFORM TO UNIVERSES YET UNBORN* that can only come as the whole planet pours forth Light. There is no human being that is an exception to this inexorable Law, for the sum total of Electronic Light Substance required of the Earth can only be met as

each lifestream gives of the *MAXIMUM* of its own outpouring. The countless tons—hundreds of thousands of tons of the primal Essence of God, pre-ordained to be the Light of the Earth, has passed through each lifestream, that has been mis-used. People must now redeem this Substance—every Electron of it. The Violet Transmuting Flame and the Sacred Fire will assist them, and you can help them if you will in their task. Such assistance will be greatly appreciated, not only by the Masters in charge of the Earth sphere, but by the other Members of this Galaxy Who are awaiting the obedience of the Earth inhabitants.

CHAPTER V THE GREAT DIVINE IDENTITY

The Ray of Light from the Heart of the "I AM" Presence, which is the animating Power of the personal self, is but a very small part of the activity of the Great Divine Identity behind every man, woman and child in the Universe. This Ray of Light flows through the outer self without a great deal of conscious thought directed through it from the Heart of the Presence, any more than a great lake, at the top of a mountain, gives individual attention to the thousands of brooks and rivulets that find their way down the sides of the mountain in their course to the sea.

The outer self has magnified its importance in the Universe to a degree far beyond the measure of Truth. The outer self only becomes important at the hour when the renunciation of the lower self is complete, and at this hour the Great Divine Cosmic Presence sweeps through the outer self and utilizes it completely as Its Own, to perform service in the third dimensional plane, which will complete its externalized manifestation, as the Divine Self which passed through Jesus proved. It is a rather startling fact to consider that the exquisite and beautiful manifestation that Jesus performed on the Earth was but one small facet of His Presence's Gift to the Universe, and that from other Rays directed from the Cosmic Heart of His Presence there have been, and will be, equally beautiful Divine Outpourings to enrich the universal scheme of things. This study should not give rise to a feeling of unworthiness or worthlessness, but it is meant to show you the tremendous powers and cosmic capacities of one's

own God Presence.

The average individual whom We study has a vague, visionary picture of his Presence suspended in space with a benign smile, concerning Itself with nothing but the overshadowing of the personality, floating through millions of years, completely unconscious of the Universal Scheme, contemplating this individual Presence, which--sometime, somewhere--might condescend to assume a speaking relationship with It. Following the trend of the human mind We find that the personal self, becoming aware of this vacuous Individual suspended in space, becomes tremendously self-righteous when It does assume a speaking relationship, feeling that the Higher Self must, of necessity, be suffused with joy at such a partnership and acquaintance, and that the Higher Self, from this moment forth, pursues a constant bombardment of the personality with all manner of miracles and marvels, which, mind you, have lain dormant for centuries until the personal self chooses to call It forth.

The little individualized form of the personal self must do far more than direct a few injectives into the Universe to secure either the attention of the sustained cooperation of the Divinity for more than the already allotted outpouring, which is the sustaining power of Life, for, far more than the wise human being who has seen the over-exuberance of personalities has the Divine Presence seen the spasmodic spiritual efforts of its own personal self rise and fall like the tides.

The very instant that the feeling nature conveys to the God Self that the hour of accomplishment is here, the Divine Presence begins Its tremendous outpouring which will result in a Union that

makes all men and women Gods and Goddesses in their time. Proceed on this contemplation and find what is within the Heart of which I speak.

CHAPTER VI THE DESIGN OF EACH LIFESTREAM

The design of each lifestream varies according to the particular design that the Father has for His child and for His Planet. The Presence of each individual has certain particular qualities and gifts by which the Universe and Its great Cosmic Scheme will be enriched, and which differs as much one from the other, as the buttercup from the oak tree. In the process of evolving the Perfect man and woman, the Great Presence must send down shafts of energy that predominate the qualities which will become the service of that individual to the planet and its people also when the lifestream is undeveloped, those qualities are distorted and other unascended beings (not able to see the Divine Plan and Pattern behind the strong energy waves) find dislike and disapproval in the experience of contacting these qualities in their fellowman.

For instance, the Great Cosmic Presence Who will direct governments and great cooperative enterprises has a tremendous pressure of power, which in the undeveloped, expresses as aggressiveness etc. The very ascetic lifestreams who will be leaders in art and the drama have a sensitivity and a grace that perhaps is distorted and grotesque in the undeveloped, especially when functioning through male embodiments, and We could continue indefinitely upon such a line. It is like looking at the steel girders of a building before the marble, the ivory and mosaic work are placed. To the untrained eye the skeleton of the Taj Mahal was an unromantic building, but to the architect and to the Illumined it promised that

poem of beauty yet unequaled on the Earth plane.

To each other, the great steel girders of your future greatness are similarly unpromising, but to the Eye and Heart of the Master they do spell poems unequalled among men. Think of this often when in contact one with another. If discord, heartily and vehemently with the integral structure of another lifestream appears, the Architect Above perceives through the present limited inspection of the Divine Impulses that such a strong pressure on the character is such that the individual himself can neither explain, control nor excuse.

CHAPTER VII A MAN'S CONSCIOUSNESS

A man's consciousness is his castle into which no part of life can intrude, neither the Godhead Itself, the Master Kingdom or any member of the race, unless invited. Men have been known to close their consciousness deliberately by controlled thought force so that even a Master could not penetrate it by the Law of Sanctity of the Self unless invited to do so.

In a man's consciousness are all the riches that are an eternal part of his soul, which he takes with him through the long course of embodiment, stretching from his individualization to his Victorious Self Mastery. There is no intelligence outside his own Holy Christ Self that is familiar with the depths and heights of the individual's realm of consciousness. His own outer mind is aware of less than forty percent of the Perfection as well as the depravities that form his store of experience. This consciousness which is the Gift of the Parent Flame in endowing individualization is the instrument of creation by which the Self, one day, shall expand the Will of the Universal King. To learn the control of the factors of consciousness is the purpose of existence and being.

The entire service of the Teacher, even in the finite world, is to find a way and means of entering the consciousness of the student, and that by the blending of the knowledge and wisdom of the Teacher with the receptive and fertile consciousness of the aspirant, the student's consciousness might grow. This requires an eagerness and willingness to learn on the part of the student, and the opening

of the consciousness to the infiltration of the new ideas which require the capacity of the Teacher to project the store of His own knowledge and feeling into the upturned Cup which the evolving consciousness of the student holds forth. Those who are able to reach the consciousness of the nature kingdom, bridge for a time, the great chasm between the thinking Flame of the human being and the Instinctive Flame of the four-footed creature—they convey the wealth of consciousness of the former to the latter—thus are the domestic creatures enriched and also raised in consciousness—thus does the human teacher convey to the child, and thus does the Ascended Master bridge the gap, equally as great between the human kingdom and the animal, in conveying the Cosmic Consciousness to the open and searching aspirant's cup.

If the aspirant is open of mind and heart, the conveying of the Cosmic Consciousness is much more rapid and the evolution of the aspiring one is hastened tremendously by the willing association and the dwelling in the Higher Spheres of thought and feeling of the Teacher through contemplation, through readings, through applications and devotions. What the individual secures from contact with the Master's Consciousness represents his sole riches in any embodiment that can never be taken from him. These are the 'treasures laid up in Heaven' of which Jesus has spoken. The union of consciousness between Master and pupil forms the link and the bridge between the human and the Divine Parent Consciousness, for the Master Consciousness is *ONE* with the Parent Flame of the Universe.

To leave off all thought of form, and plunge into this Realm

of Creative Cause and draw the wealth of the Cosmic Christ Consciousness of any member of the Ascended Host is to secure a tremendous, permanent unfoldment of the Holy Christ Self to the one willing to make such an effort.

CHAPTER VIII TIDES AND CURRENTS

You have seen the tide come in, and upon that tide, boat and beast can ride with ease, carried by the pressure of that unseen, but potent force which rushes shoreward from the depths of the sea. There are other tides and currents yet undiscovered by mankind within the Earth Itself, upon Its surface and within Its atmosphere. It has been hinted, that the great currents that encircle the planet Earth when discovered by the scientific world will form natural channels for aerial navigation that will increase the speed of the planes far beyond that which could be generated by any active power of a mechanical engine. In other words, the tide of the sea and the currents of the air are invisible, but powerful motivating forces which mankind can join at will in order to accelerate their progress upon a given pathway.

In spiritual matters, at the beginning of each Cycle there are established certain Cosmic currents directed earthward and directed heavenward as strong as the tides of the sea into which wise aspirants can enter, and on the downward arc, receive the revivifying currents of the spiritual realms to fan their sparks to Flame, and on the upward surge to rise far before they tie into a new Realm of Consciousness and expansion.

The statement is then issued that 'The Cosmic moment has struck when the Ascended Masters call you to victory and freedom in the Light' . . . This means that the Cosmic Tide has been set into action, which is an upward surge of energy connecting the Earth

with the Higher Octaves, the flood-tide coming high on the shore, it carries a potent power to propel any and all parts of Life that choose to identify themselves with it into the next octave of expansion or the Ascended Master Kingdom. This tide is in motion. It is intensified and increased by every soul who has joined his stream to the celestial River.

As the activity of the Sacred Fire spreads into the outer consciousness of mankind, this rising River of Flame will grow stronger and more powerful, and all those who wish to avail themselves of the impelling currents can precede their destiny for centuries, for there will come an hour when the tide will ebb. To gain and to proceed against an outgoing tide is a more than human task. Therefore cultivate and encourage always the consciousness within the students who avail themselves of this propitious moment.

CHAPTER IX THE INDIVIDUAL AND HIS GOD REALITY

Your beautiful "I AM" Presence was made in the image and likeness of God, imperishable, self-luminous, divine, and animated by the Flame within which is contained all understanding and powers, all love and all the gifts that the Father uses so freely in the establishment and maintenance of His glorious kingdom.

Your human personality is but one facet of your Presence, just as a mother who might have a family of six children would find each child but one facet of the expression for her love, care, and her sustaining consciousness which from generation to generation might enrich the Universe.

This being the case, you will see that the personal self can only secure the cooperation and assistance of the God Presence as the personality desires to enter into the work of the Presence; understands the Love of the Presence and cooperates with the fulfillment of the Great Divine Plan of the Presence with regard to the Universe; otherwise the personality receives but the small allotment of energy which passes into the mind and body of all men, women and children to sustain them. There is but one way to secure a greater outpouring from the Presence, and that is to honestly desire to become of more use to the Presence, and when we do so the Presence is aware of it and more and more of the outpouring from the Presence will be the proof to you that the happiness, peace of mind and heart doth lie in endeavoring through your own limited consciousness to serve your Presence to the best of your present

abilities. Some people will serve the Presence more, and some less, according to their present ability to contemplate what it is the Presence desires, and to use the faculties of discrimination in preparing themselves to serve the Presence.

It is more important that the individual be sincere in his desire to make himself a better channel for the Light of the Presence than the amount of service he renders. No one will ever be happy anywhere on the planet Earth, or on any other planet, until he or she desires and decides to become a facet for the out-pouring of God Reality, because that is the reason for his being, that is the reason the Forces of the Elements sustain the individual's vehicles, and the reason why, for millions of years, Life has been kind enough to continue to provide for the personal self preparatory to this hour.

CHAPTER X UNIVERSAL LIGHT SUBSTANCE AND LIBERATION

Visualize every man, woman and child standing in a great sea of Pure Light, which is as still as a lake on a calm summer day. That sea of Light is the Universal Light Substance which fills every nook, cranny and corner of the Universe, but which does not have any vibratory rate until set into motion by the individual within the heart of the circle.

Vibration is co-existent with creation, and the instant that this Light Substance, or energy of God begins to move and form, cause and effect instantly begins to manifest. Unawakened mankind are constantly sending forth vibratory action which is formed through the energy they send forth, just as the whirls of water circles out from a pebble dropped into the center of a pool.

The student, even as is the unawakened man, is a constant creator of vibration through his thoughts and feelings. The nature of the vibration is determined, of course, by the thought and feeling held within, and the manifestation of his environment, bodily conditions and associations. These are the outpicturing of his choice of thought and feeling through the centuries--just as the music that fills the room results from the choice of the musician as to that particular composition that he will render.

Chelas of Light must come *NOW* to a point where they are willing to recognize the vibratory action that passes from their minds and bodies every instant of the day. When out of order, it will interfere with the fulfillment of God's Plan, and disfigure the Universe.

When in agreement with the Law of Harmony it will naturally beautify, harmonize and purify everything connected with the chela's world, and it will fulfill the Father's desire and design to expand the Kingdom of Heaven. The Kingdom of Heaven radiates into the third dimensional plane on harmonious vibration, and where one or more can be found to be conductors of that Kingdom, the Host of Heaven rejoice that an open door thus established and maintained in Love gives Them another facet for fulfilling Their part in the design for the Earth's greater good.

CHAPTER XI VIBRATIONS OF ELECTRONIC LIGHT

I would like to describe how every organism and every manifestation is, in essence, a vibration of Electronic Light--the wave length determining the quality of such form.

The perfect manifestation of every form pulsates at a rate of vibration which is harmonious sound and color, although all manifest form does not vibrate at the same rate. For instance, the vibratory action of gold is much faster than the vibratory action of iron, but both vibrations in their natural and perfect expression are harmonious. With human qualification however, the vibratory action of living organisms as well as so-called inanimate objects can be changed by propulsion of energy into the center from whence their vibration proceeds. Energy that is released through any self-conscious center can and does tangibly effect and change the natural vibration endowed by God to all manifest form and the resultant change of times permanently affects color, tone and substance in an imperfect manner. Thus, in the mechanism of man as well as in his environment and surroundings, the natural harmony of his organism, as well as the natural harmony of the substance which Life places around him can be adversely affected by thought and feeling, distress of mind and body, or limitation of affairs. Results from this repolarization of the electrons changes the wave length of the manifest form.

When the individual comes to a point where he chooses to abide within the Harmony of the Great Cosmic Law, he has the opportunity of calling the Cosmic Flame of Love, Harmony and

Peace from his own Presence through the organism of his physical vehicle and inner bodies; through the manifestation of limitation; through the distress in his world. The repeated drawing of this harmonious Flame will bring back the natural vibratory action of the substance in and around him to its perfect expression. When this is accomplished, there can be no disease, distress of limitation—which is really but a radiation from the substance that has been shocked from its natural emanation, consciously or unconsciously by the individual's own use of the life force through the centuries.

Rivers of energy may be drawn from the heart of any Ascended Being through any organism or cell to bring Peace, Harmony and Balance wherever there appears to be any shadow of lack, ill health or distress.

CHAPTER XII MOULDING THE ELECTRONS

Electronic Light is charged with the quality of obedience to the Sacred Fire, therefore the electronic light that fill the Universe; that makes up the bodies of the people, the homes in which they live, and all the services in which they are presently engaged, has obeyed instantly the direction of mankind through thought and feeling. The bodies the people wear are but the endeavor of the electrons to outpicture the thought and feeling forms which they are commanded to fill, and in which they in obedience can manifest.

At the end of a Life cycle, the exquisite electrons which were voluntary prisoners to the will of man, come to a point of redemption. The electrons themselves, as the Cosmic Light increases, will develop a freeing power which will throw off the fetters and shadows imposed upon the Light by the human consciousness.

As the Electronic Light within the lifestreams begins to quicken, it temporarily seems to accelerate many of the conditions of human manifestation, but this will be only a short-lived process, followed by an entirely new world, shaken free of the miscreating thought and feeling processes of the unawakened.

If you will make tremendous application toward the calling forth of the beautiful Light Pattern within the bodies of the people, particularly the young generation, you can assist Us in establishing a race of Gods and Goddesses in a very short period of time.

The electrons around your own body now can be moulded into the most exquisite forms, just as you would mould a piece of

marble into a very fine piece of statuary. The electrons are so eager to fulfill a Divine Pattern, that if you choose to reach into God Consciousness and draw forth that Divine Pattern, and hold It in the Electronic Light Substance, you can experience marvelous precipitation.

You have the conscious ability to change the vibratory action of any electron or group of electrons that are within your personal compass, whether they make up the organism of your body, the personal environment of your home, or the vehicles of the lifestreams around you.

First and foremost you must disabuse your minds from the concept that matter is inanimate and motionless, for it is all condensed energy. Energy by its very nature vibrates and releases a radiation from the smallest electron to the greatest Sun. The radiation from the electron determines its quality and its effect upon the Universe. If the electron as an individual particle, or as a composite mass, making up some physical form, is radiating according to God's Plan, its effect upon the rest of Life will be pleasing, harmonious, uplifting and beautiful. If the radiation from these electrons, consciously or unconsciously, distresses any part of Life, these electrons must be redeemed and repolarized through Love.

Any self-conscious, thinking individual can change and control the quality or radiation within his body or outside his body, by the use of the Sacred Fire. For instance, if there should be pain or

distress in any member of the body, that pain is merely a radiation of inharmonious energy which is a pressure upon Life. Therefore the quality of radiation within the offending organism or member, must be changed in order to bring relief and release to the member and to the entire lifestream.

The reasons for the radiation of inharmony from organisms and cells are too numerous to mention, but those organisms and cells have been heavily charged with inharmonious energy which has changed their natural keynote and tone, just as a melody on the piano can be changed by one individual placing his hand heavily upon the keys without tracing out a harmony that will blend with the harmony played. Thus we see that pain is but the electrons' radiation which can be changed by the call to the Presence and the Ascended Masters to pass the Cosmic Flame of Love through the core or heart center of these electrons and that organism, in so doing re-establish the natural harmony within the member.

When harmony is established, the radiation will be in accord with the Divine Plan and no distress ensues. This is equally true of limitation which is merely a radiation from substance already within the individual's world which should naturally radiate opulence and supply, but which has been repolarized until its emanation is fear, uncertainty and distress.

To change the quality of radiation within one's own lifestream and environment is to become master of circumstances and the individual governing power of one's own life and world.

CHAPTER XIII LAW OF CREATION

I shall now explain in detail, for the illumination of the students, the descent of the Electronic Light which is so much a part of your daily experience, and which is in reality the animating power of your every action and re-action.

Your mind can grasp clearly the passage of these beautiful and perfect Electrons from the Heart of the Father to the Heart of your Presence. You can visualize Them within the Heart of your Presence and then you visualize them released in Joy from that Presence on Their journey through the personal self into the physical appearance world, but at this point there comes a confusion into the mind as to what causes the tremendous change in Their appearance and Their efficacy from the moment They leave the Presence until They enter the physical heart.

You have a vague comprehension that they are transformed into the qualities of the lower nature. You have a strong conviction that their radiating power seems diminished and limited. I would like to make the entire picture as clear as possible for your individual application, and for the protection and safe convoy of this beautiful Electronic Light.

Your four lower bodies are convex circles of force in which your physical body is the smallest, and represents the center or kernel of the complete set of vehicles.

The Etheric Body envelops the physical form. That, in turn, is enveloped by the Mental Body, and the Emotional Body encircles all

three.

Therefore, the Light passing from the Presence into the use of the Higher Mental Body is transmuted into-emotional matter-mental matter-etheric matter-then physical matter. We use the word 'matter' advisedly, which represents the substance of the different spheres.

Your Holy Christ Self was created to transform the electrons and slow up their vibratory rate of action to a point where they might be passed into the use of the lower bodies at a rate which would assist their evolution, and not destroy the lower bodies by the intensity of their vibrations.

In like manner, the four bodies were provided to transmute the electronic substance into vibratory action of the different spheres, changing its vibration but not its quality, just as you can play on your piano a chord in the treble and a chord in the bass just as true and beautiful, but with a different vibratory action corresponding to the octave in which you play.

This Electronic Light coming from your Presence was to enrich the seven spheres through the body corresponding to each sphere, and these bodies were to be conductors or transformers of the pure Essence of God into elemental particles pure and perfect and self luminous, but vibrating at the same vibratory rate of action as the sphere which the body represents. Thus were the seven bodies to be enriched, illumined and purified.

You say it seems a punishment to take pure, rapidly vibrating energy and slow down its vibratory action, and imprison it within a sphere where the energy vibrates at a similarly slower rate, but this

is the Law of Creation--and if it had not been interfered with by the usurped authority of the lower vehicles, the seven spheres of manifestation would have filled their Cosmic destiny with no imperfection and no impurity, and your bass notes, your treble notes and your melody would have expressed the Cosmic Keynote of your Planet and its people!

Now, to come back to what happens to the electrons in your individual experience. They must pass through three bodies before they reach your physical form, which accounts for the fact that where you should find great strength, youth, resilience and rejuvenating power within the electrons, they have been already milked dry by the various activities of your mental, emotional, and etheric bodies until they are distorted and depleted by the time they enter your flesh form.

That is why you have been told repeatedly that in order to have health you must have peace of mind and harmony, because all the electrons in the Universe carrying those qualities must pass through your mind and your feelings before they can find expression in their full strength and health giving potent powers in your physical form.

Here you have again the 'screen' of your etheric body, containing the sum total of every experience you have ever had, and your natural tendencies, strengths and weaknesses, and if the electrons pass safely through the emotional and mental bodies, they are more or less affected by the etheric records, accounting for tendencies, heredities, etc., as they pass through the etheric body into the physical.

At this point the outer self becomes completely discouraged of ever securing any semblance of health, but this need not be so. We told you about calling for a Tube of Light direct from God's Own Heart into your physical heart and asking that these electrons, as they pass through your four bodies remain uncontaminated. You can also ask for that Tube of Light to be placed around your physical form and that will give you 'emergency relief', just like your oxygen tent of your artificial transfusion *BUT* sooner or later the natural flow of your own energy must be given an opportunity to reach your physical form uncontaminated, and this physical form is really but the outpictured accretion of the other three bodies. Here you have a little exercise that should occupy the rest of your embodiment.

We do not go into too much detail of the Law, because, in the first place, it is so very seldom that We find many people who will still their minds long enough to listen, and in the second place, they cannot retain too much of the Law due to their present accumulation.

Therefore you must maintain peace of mind and harmony in your feelings (your mental and emotional worlds) in order to have health in your body and success in your affairs.

You can see, then, as if it were an open book how it is impossible to even *force* good upon any lifestream, because it has to come to them through these lower bodies, and if these bodies distort it in passing, it can never get through into the experience of the outer self in its pure, unadulterated state.

CHAPTER XIV GATES ON THE PATHWAY OF LIFE

Tracing the life of a child, you will see that the child passes through many stages of successive order until manhood or womanhood is achieved. These stages from the helpless infant, the small child, and the adolescent are like gates on the pathway of Life through which the soul is propelled in orderly sequence in order to experience the majority, the fullness of maturity. Order is Heaven's first Law, and even Jesus passed along through these various gates before His Christ Manifestation in Judea.

In a similar manner the soul in its evolution through matter and its return to the Bosom of the Father, must pass through certain outer stages preparatory to its full God Identity. The mankind of the planet Earth, at the present time, are all or for the most part, in the personality state, and the next gate open for them is into the Higher Mental Consciousness, or the Christhood. By the very same impetus that does raise every infant to maturity, so will every lifestream on the planet Earth unfold toward that Higher Consciousness in their progress toward Divinity.

Answering your thought--that many infants never achieve maturity and pass through the dissolution of the body at the end of an entire Earth span--I say this is true--and that the same is true of spiritual development; some proceed more slowly than others, but the eventual goal and culmination of every life experience is to achieve mental, emotional and physical maturity in a flesh form and to achieve Christhood through soul growth. Because of the factor

of free will and karmic experiences, all do not pass through the gate at the same moment, but that gate is the goal toward which every lifestream presses, consciously or unconsciously, and the Christ Expression is as fore-ordained for every soul belonging to the planet Earth as are the oak tree's leaves fore-ordained in shape and color before the acorn finds anchorage in the earth.

That which you have come to know as the Holy Christ Self is an attitude of Consciousness, of thought and of feeling. You can refer to his Christhood, her Christhood, Jesus' Christhood, Mary's Christhood, etc., but the state of the Christ is *ONE*, and every lifestream that enters that state assumes the thought and feeling enjoyed in common by all who have passed through that gate, even as all vehicles enjoy a heart and vital organs in common.

If you will cultivate a contemplative attitude toward that Christ Expression, not as something seen in others, but as acting through yourself, you will open the door to more and more of Its essence to raise you into that *ONENESS* with the Power for Good which all so desire to express.

CHAPTER XV THE CHRIST CONSCIOUSNESS

The Consciousness of the Christ is what Beloved Jesus endeavored to perpetuate through the Holy Communion, and sincere suppliants through the ages, who have accepted that Communion have shared, to a limited degree, that exaltation of the personal consciousness which Jesus promised to those who chose to observe practice in remembrance of Him.

A most beautiful meditation is to elevate the Host of your own consciousness to the Divine Christhood of your own lifestream. The blessed chelas strain so . . . in order to achieve this State of Consciousness, they would be wise indeed if they invited the Christ Identity, for Its pulsating Light and Power can raise and sustain the individual's thought and feeling processes far better than any effort of human will.

The Christ Consciousness can be practised, and is best practised following a contemplative period during which the heart's call for Illuminaiton reaches the Higher Self, allowing the Light to flow through the thought and feeling. The Directing Christ Who raises the consciousness of the personal self like 'sweet anointing from above,' never fails to answer an individual who can reach through this experience and the individual who can do this, will find his life sustained on an even course of spiritual peace and serenity--no longer troubled by the waves and feelings that flow uncontrolled through the mass mind.

The Christ Consciousness will decidedly differ with the

consciousness which the average individual uses in daily contact, but the comfort within it will be so powerfully present that the change of polarization of the lower bodies' nature will neither be unpleasant nor a cause for confusion.

I offer a distinct and definite prompting to all, to cultivate a 'speaking acquaintance' with this Divine Self within each of you Who can become the Law and the Resurrecting Power of your lives when invited to do so.

CHAPTER XVI MUSICAL TONE OF ENERGY

Every pulsation of energy that is released from the Heart of God sounds the most beautiful bell-like tone, as it passes in liquid music on its outward course to manifestation. To see the electronic energies, like liquid sunshine, leaving the Heart of the Father, each one releasing the clearest, truest and most beautiful melody as it is freed for expression, is to witness the ineffable joy, majesty and harmony of creation which was, by Divine Edict, to be experienced in its fullness by every lifestream created of the Father.

When the impulses from the Presence passes through the physical body, if they were undisturbed by the vibratory action of the lower nature, their same beautiful melody would flow forth through the gestures, the words and the radiation of the lifestream until that energy had fulfilled its course and began its return journey upward to God's Heart.

Picturize what a group of unascended beings could manifest were they to allow these Divine musical impulses to pass unhampered through their lifestreams, their very beings would outpicture the exquisite Divine melody which We are aware of, but seldom see, in the grace and dignity expressed among the few awakened ones unascended. In Greece this natural rhythm of the Higher Nature was so perfectly developed, that the bodies retained their youth, resilience and beauty far past the so-called line of demarcation that does separate youth and age in the world today.

If you could comprehend the tremendous Cosmic service

your lifestream could render in the recognition of your ability to make the calls for the harmony and melody of the Holy Christ Self to pass through the human forms of all unascended beings, you would begin to touch upon the promise given you, that by your inner nature you are attuned to and qualified to do much in the healing of the distorted expressions of Life.

When the Ascended Master moves His hand, the exquisite out-picturing of beauty and harmony had its beginning in the Heart of God, and the music of that impulse was carried through the finger tips undisturbed—so it could be with all unascended beings who chose to experiment with this aspect of God's Law. The bodies and minds of the people suffer because the natural harmony within the energy is distorted and the rhythm broken, and that rhythm can only be restored when we look to the Source from whence came Its initial beauty.

All vibrations that are contrary to God's Law of Beauty and Harmony have beginning and end, but the vibrations that proceed from God's Heart and pass through the lifestream are eternal. You must tune in to them in order to experience the fullness of your own destiny.

CHAPTER XVII THE WHITE GARMENT

"To him that overcometh shall be given the White Garment." This Garment is woven by the "I AM" Presence into the substance of the bodies and aura of the evolving soul's consciousness when the attention of the heart is centered on the Spiritual Center from whence all Blessings truly flow.

The aura around the lifestream consists of a constantly moving sea of electrons, passing outward, driven by thought and feeling, and returning inward on the return course of their circular journey to find oneness in the heart of their creator. The Radiation from the Presence, however, is vertical, and passes downward through the bodies, and it completes the circle back into the Presence, so you have the directive activity of the lifestream going out in a horizontal line tying you to the manifestations of the Earth, and the more ephemeral electronic circuit coming from the Presence and directed into the affairs of the world, that circuit is more powerful because of the intervals of contemplation, prayers and devotions directed to the Source, from within the Divine Circle that unites you with the Godhead. This is the beginning of creating that White Garment, that Seamless Robe.

When the individual is no longer interested in the satisfaction of the personal self, and more and more of the life energy is directed toward the Source--this Cosmic Christ CLoak, or Seamless Robe, woven out of the individual's own love for God, not only increases in intensity, but begins to form a natural protective ring that dis-

connects the energy of the lifestream from the magnetic pull of imperfect manifestation. One day when the powerful circuit from the Presence to the heart, and the heart to the Presence transcends the pull from the heart to matter by one percent, the Ascension is possible, though not always accepted if the service of Earth requires a continued manifestation, but those who wear the White Garment and are fifty-one percent God-inclined are the Cosmic Christ Presences that move the world.

In your private meditations, contemplations visualize that Mighty Electronic Substance forming that Garment and intensifying Its protective, as well as invigorating power within your lifestream.

CHAPTER XVIII CONSTRUCTIVE VIBRATORY ACTION

All have experienced the change of vibration that takes place when an unpleasant appearance is flashed upon the screen of maya, but with the constructive vibratory action, mankind has not experimented to a point where they are Master of the establishment and sustenance of the currents within their bodies, which are requisite to the connection with the Higher Realms.

As the individual radio set determines the capacity for that particular instrument to contact and transmit programs over certain wave lengths, so does the development and capacity of the lifestream to consciously control the wave length of his own vibrations determine his ability to contact the Higher Octave in order to receive instructions accurately, and fulfill on the third dimensional plane the Will of God.

In the Ascended Masters' Retreats individuals spend many hours in experimenting with their capacity to create a vibration sympathetic to their own Higher Self. They are assisted by music, perfume, pictures and talismans of one kind or another that carry a vibration similar to the particular vibration they are endeavoring to set into motion within themselves. Then through the avenue of their senses--the sight or the hearing, the sense of smell or touch--the inner bodies try to vibrate at a rate similar to that of the music, perfume, etc., and with the assistance of the Teachers in the Retreats, their inner bodies are guided in this manner of vibration until they can themselves connect with their Higher Self which then will

become their instructor.

When you have a group of students in the Western World, a pattern is set up for class work and one Master is in charge. The vibratory action of every student will be very distinct according to their development, and it is a requisite to blend all that vibration into one rhythmic pulsating wave, sympathetic to the Master who was chosen that day for His outpouring. The individuals closely attuned to that Master and His nature will find it very easy to participate; there will also be within them a strength to raise the others. Some individuals will find it almost impossible to tune into that vibration because their development may be along another line, and they, of course, will tend to interfere with the Master's effort. The work of the Instructor is to present to the senses enough inspiration to stir, particularly, the Emotional Body into a response and sympathy toward the Being Who is the object of their worship. This Master is constantly directing His Cosmic Currents through their inner bodies in order to assist in the awakening process, so they are able to contact the Higher vibration for which they are striving.

This then is given in detail so that it will enable the students to realize that the outpouring from their hearts towards other lifestreams assists in raising the vibratory action of their fellowman.

CHAPTER XIX CONSTANCY OF SPIRITUAL UNFOLDMENT

People consider a sense of need or a consciousness that senses that there is room for improvement sometimes an unhappy lot, yet with regard to soul and character growth, as well as with regard to physical and mental well being, the saddest and most unhappy state is the individual who is completely oblivious to any realization that improvement and unfoldment are possible, plausible and practicable.

A well satisfied man, a well satisfied country, or a well satisfied soul has *stopped* along Life's highway. The restless and seeking soul, though to outward appearances seems more harassed than his companion, is a more hopeful specimen, both as regards his selfhood and his service to the race. The balance, of course, lies in the center of the two extremes, neither the lethargy of satisfaction nor the disgruntled bitterness of discontent. An intelligent center between those two poles makes the soul capable of grasping, in a gradual unfoldment of its need, of certain specific requirements wherein and whereby character can be strengthened, the capacity to serve widened, the physical and inner bodies matured, and the environment and place in society evolved, thus making the individual focus a more perfect expression through which the Cause of Good may be served and the peoples benefitted.

There are Beings in the Ascended Master Octave wholly dedicated to the task of stimulating the capacity to sense a need within the souls of man, because where such an one can be found

and the interest stirred and sustained to a certain point, that their need or requirement sets up the call which will magnetize and draw through the Veil, the fulfillment which has been pre-perfected and but awaiting the demand from Self-Conscious Life to put in Its appearance through the world of form.

For instance, if the body does not demand breath through the actual drawing of the air in to the lungs it can die--although the Fullness of air is ever present. The body elemental is so firmly charged with the specific realization that it needs air to sustain its body-life that contrary to its naturally lazy vibration, but stimulated by that need for air, it continues, twenty-four hours out of twenty-four, to make the necessary invocation upon the ethers which fills the lungs and satisfies that need.

This gives you a small comprehension of the capacity of the soul to sense a need, and then rather than dwelling upon the need, to storm Heaven for its fulfillment.

CHAPTER XX QUALIFICATION OF ENERGY

If mankind could but understand how the four lower bodies are constantly emitting particles of themselves into every activity of their daily life, they would be amazed and a great deal more careful of the quality which they place upon the substance around them.

Divine Fire, the Heart Center of all creative activity must pass through the elements of the ether, the air, the water and the earth, in order to become physical manifestation. Divine Fire in Its own Realm is the highest and purest expression of Divinity, but to interpret the perfection within this Divine Realm of Creative Fire for the planet Earth and Its people, there had to be provided a medium by which the atoms of these four realms might be clothed around the Fire to make the physical expression, and the four lower bodies of mankind were provided for this natural precipitating activity by which the Divine Ideas of God could become manifest. A box, a shoe, a chain are, first and foremost, made of Pure Fire, then just like pieces of chiffon, the substance of etheric, mental, emotional and physical planes are coalesced around it until the manifest form is vibrating at a rate that can be seen, felt, handled and utilized by the mankind of Earth.

People with a developed inner eye, can pierce through these sheaves and see the living Fire within them, whereas the physical eye can but see the sheaves that dim the Glory of the God within.

The word 'desire' means 'of the Father' and the word 'idea' is also indicative of that which proceeds from the Universal Eye or

ONE. If people and chelas could realize that an idea is much more than just a vapory cloud that can be dispensed by the slightest gust of wind, but is rather a fiery Heart Center which forms the crux of a particular gift projected into some mind with the hope that the four vehicles of the lifestream might seize upon it and giving it of their substance, manifest it in form. If such a realization could be engendered into the mind, so many of the visions of beauty could become manifest. For instance--the Beloved Mother Mary--when the Divine Idea of Conception of the Christ Child was presented to Her Consciousness, She poured all the energy of her thought and feeling, all the energy of her etheric consciousness into that Divine Thought, and in the Silence, her own vehicles wove the garment for the Master Jesus, but had she abandoned, through ridicule, unbelief in Herself or Her Divine Visitant, the Immaculate Concept presented to Her, manifestation would not have occurred. It was indeed a difficult task allotted to the lifestream of a young woman who was given a Vision against all common reason and sense, and who, if she had wavered, would have destroyed the beauty and harmony of the vehicles required for the mission Jesus was to perform. Mary's constancy, strength and fidelity, and devotion to Her Immaculate Conception is deserving of the constant gratitude of the Host of Heaven, and should be deserving of the gratitude of the sons of men.

Any idea presented to you by God becomes your charge. It is a child of the Father, and according to your offering to such an idea from your inner bodies, does manifestation occur.

CHAPTER XXI COSMIC PULSATION OF THE SACRED FIRE

Mankind, for the most part, live in a world of effects, buffeted about by the countless manifestations of the inner causes set up consciously or unconsciously in the process and experience of living.

As two sticks rubbed together create fire, so does the thought and feeling consciousness of mankind create cause, and it is no more possible for an individual to have a place in this Universe and not take the responsibility of creating cause than it is for the Sun to create and emit shadows, rather than Light.

When mankind were endowed with the process of thought and feeling, the power of creation was automatically endowed upon their lifestream and every thought and feeling process created a cause and a subsequent effect which lived in the world of its creator and must remain a part of his experience until the cause has either exhausted itself by the depletion of its energy or is consciously dissolved by the Sacred Fire.

The amount of energy in the thought and feeling body connected with the creation of a cause, consciously or unconsciously, will determine the intensity and duration of the effect. When the energy put into the original cause is exhausted, the temporary effect is dissolved, that is why individuals who suffer disease and afflictions are working out karma, the length and intensity of which is determined by the pressure of feeling in the original cause.

All causes set up at Inner Levels must be worked out through karma, and the energy spent in the world of effects, until the individual

comes into a knowledge and use of the Sacred Fire. Through invocation, focusing and sustaining of the Sacred Fire upon imperfect causes and these causes may be melted and dissolved, their energy transmuted into new vibrations and patterns—the ensuing effect being but the externalized picture of the inner cause will necessarily have a more pleasing and beneficial nature. No individual with a knowledge of the Sacred Fire need labor under any effect of limitation, disease, inharmony or imperfection, whether the causes are set up and appear on the screen of maya by their own lifestream or that of others, because the Sacred Fire of Transmutation, working in the world of cause, can so purify the energy within those causes that the effect, if out of order, will disappear.

To work in the World of Cause with the Cosmic Pulsation of the Sacred Fire is a Universal service for the selfless one desiring to help the progress of the race and to melt the chains of the masses.

CHAPTER XXII VISITATION OF THE DIVINE SPIRIT

Your contemplation and study of human nature relative to the Great Divine Nature of God finds you of the conviction that the human self, from birth to death, is subject to little, if any, change in its integral habits, desires, appetites and expressions.

There comes, however, in the evolution of the soul, an hour when the Divine Nature begins an active penetrating process through the erst-while dormant outer self, and the embodiment in which such Cosmic Intervention takes place becomes one of the most important milestones in the progress of that lifestream through the journey into Ultimate Godliness.

This Visitation of the Divine Spirit, which is the blue print of every man, does not come to all at the same time, but visits each lifestream at a certain Cosmic Moment predicated upon previous search for God and application in that direction. We will find, therefore, hundreds of thousands of men, women and children who live through an entire embodiment with but little change in their nature, and scattered here and there, a soul who by reason of previous endeavor has earned the right to have the Divine Descent of the Spiritual Presence which catches up, transmutes, transforms and redeems such an one.

Saul experienced this Descent on the road to Damascus--He then became Paul and is now known as the Master Hilarion.

We are told in the Bible that "no one knows the hour the Bridegroom cometh," but every hour of every day of every life can

be spent in preparation for the Divine Descent, which at the given instant, sweeps through the vehicles, and that one, among many, becomes united to the Brotherhood in the Ascended Consciousness, and at the close of that embodiment makes the Ascension. It is not the work of a moment to secure this Cosmic Cooperation, and that is why so many sincere students seem to retain the integral nature with which they were endowed, and the Great Transfiguration occurs but seldom in the lives of such people, but because of the search and service, for nothing is lost nor wasted, the hour of Transfiguration in another clime and age will be greatly hastened.

Referring to Our Service to the people from the Octaves of Light, if We pour Light directly from the Presence into the heart We can only do so when they sleep, lest the same distortion should occur, and for your further illumination I would like to explain the condition of the sleeping bodies of the people.

The physical bodies appear in every sort of depravity, and the mental and emotional bodies never cease motion even while the physical body is temporarily unconscious in sleep.

The far greater part of Our service to mankind is while they are in this unconscious state because, while they are not completely still, at least the conscious mind is inactive.

One call that no one has every thought to make is for *THE PEACE OF PERFECT SLEEP FOR EVERY SOUL* for the quieting of the mental and emotional bodies in slumber--this would allow us a tremendous assistance in Our endeavors to revive them spiritually.

CHAPTER XXIII POINT OF CONTACT

The mind of man, through the vehicle of the mental body, is the matrix or vessel into which the ideas from the Higher Octave are planted, with the hope that the cooperative faculties of the individual lifestream will cultivate and externalize in their fullness those gems of perfection.

It is an interesting study to contemplate that the mental body and *NOT* the emotional body is the point of contact by which ideas enter into the compass of any individualized Flame, and the office of the Emotional Body is to give Light and Substance and Reality to perfect the process of germination or to actualize the idea.

We will see, then, that although the mental body carries far less than half of the energy of the lifestream, yet, like the father, there could be no child without the cooperation and intelligent receptivity from the One Supreme Source of Life on the part of the mental body which in turn must secure the interest and enfolding flame of the emotional world in order to give Life to the idea.

Intuition, radiation and the invisible pressure of the Master's Auras, while a powerful force through the emotional world, does not make that point of contact with the conscious intelligence of the mental vehicle unless there is a medium through whom the mental body can be reached, taught, interested and educated. That is why, through the centuries there have been prophets, seers and guardian members of the race who were able, according to their capacity, to

train the mental faculties of the people and then secure, to some degree, an emotional response.

When we have an emotional religion without the trained, valiant and educated mental body, there is unbalance.

On the other hand, when you have a mental religion which fails through some defect in presentation to secure the cooperation of the emotional body, you have unbalance.

The work of the Teacher is to educate the minds of the people, opening them to an understanding of the Law of re-embodiment; of the Masters and the pupils; of the Powers of the Sacred Fire, and much more, and then to secure the enthusiastic blend of the trained intellect with the loving, positive feeling which is the Spirit of the Holy Trinity.

The discipline of the Breath, of concentration, of purification, of patience is primarily for the purpose of sharpening the mental faculties to a point where the mind may vibrate at a rate that is complementary to the Universal Mind. We say 'complementary' advisedly, for it would be an impossibility for an untrained physical incarnate lifestream to make contact with the Universal Mind--*BUT* as you can have an 'A' note at the very top of the scale and one perhaps six octaves lower in perfect harmony, so can the mental vehicle be harmonized to allow the inflow of those ideas which then become the responsibility, the property and the privilege of the individual to nourish and bring forth, and to actualize as form.

CHAPTER XXIV SERVICE OF THE HIERARCHY

There are certain members of the Great Spiritual Hierarchy Who have taken the responsibility under the Cosmic Law of drawing forth from the Great Central Sun a certain concentration of energy qualified as a particular virtue. They are the Guardians of Love, of Peace, of Purity, Power, Protection, etc. From the Great Central Sun They continue, by constant adoration and invocation, to draw the particular vibratory action that radiates this Quality, and to concentrate the Energy so drawn into a Sun of Blazing Power whose radiation flows earthward like the Light of the physical sun, and carries a Cosmic and impressive outpouring of that virtue into the nature of the peoples of Earth and the atmosphere.

They are responsible to the Cosmic Law to keep a certain percentage of the atmosphere of the Planet Earth, and the inner bodies of the peoples of Earth, saturated with the particular virtue that They represent. This substance is drawn into the inner bodies and the outer nature of man in a manner similar to that by which the tree draws from the air and the earth and the water the nourishment by which it grows and unfolds; the whole unconscious process dictated by the natural Law of Survival.

However, when an individual passes from the soul sleep into the awakened state where he becomes aware of these Mighty Celestial Beings, he has the power and capacity within his own lifestream to invoke as great a release of the God Virtue, Substance, Supply, Light and Power as he shall so determine will be beneficial to the

race and the forward impetus of the Planet. The Master of the Cosmic Guardian Presence cannot deny his invocation, for radiation is a natural response to invocation, and even if the Master Himself has not the generated and prepared power and substance within His Cosmic stockpile to answer the call of the invocative Flame, He must, by Law, secure it through His own application to the Great Central Sun. Thus to invoke without limit the Cosmic Powers which will enrich the consciousness of mankind, is to stir into greater activity Their God Focus that is drawing constantly from the Great Central Sun more of the Substance from which the Kingdom is to be moulded and sustained. Weary not then in invocation, for in it is the power to redeem and renew worlds.

One of the best experiences of the Members of the Brotherhood is to find an enthusiastic co-worker in the unascended state, who never wearies of setting the Master to work in Cosmic Capacity through the power of invocation, contemplation, prayer and deep heart design. The Master is always about the Father's Business, and His radiation is a constant Sun that increases with every breath and every heart beat. Once He has ascended out of the human octave, the rapidity of the expansion is greatly intensified, for there is no pressure of resistance to deny the unfoldment of His Heart Flame in all that It desires to do in order to lighten and contribute to the Soul Good of the Kingdom. The impetus for more than ordinary expansion and the stimulus afforded the Master by the opportunity to act in the affairs of men is one of the most welcome experiences of His Cosmic Life.

Weary not in setting up such an impetus, and consider never

that those calls could be anything but a JOY in the intensification of the Master's capacity to serve Life and to grow in His own right to Cosmic Glory. Invocation is a spiritual wine of the Cosmic Heart, the stimulus of the Divine Brotherhood for which He has denied Himself the pleasures of Nirvana, because the ecstasy of the drawing forth of the Cosmic Activities in response to such invocation is the complete reward for His remaining a prisoner of Love. To see the Masters gather when a Group is sending forth calls of invocation, to see the exhibition of Their Cosmic Hearts and sometimes Their surprise when the invocations of the unascended lifestream sets them a new course not yet tried, is an experience that would stir the chela to a constant and steady service.

And so, as I turn My attention back toward the Great Central Sun, I would say that since I have made your acquaintance and have entered into association with your very blessed Selves, My Light has increased tremendously. You have afforded Me an opportunity to grow and expand for which I am very grateful, and all the Energy which has come to you so willingly from My Heart has increased My Capacity to serve the Universe and all God's creation.

You do not yet understand how the Masters welcome an opportunity for a conscious partnership with unascended beings. We have served Life for so many centuries--that time cannot measure, without the impetus of the co-workers in the Third Dimensional Plane, except for the rare exceptions that have been found throughout the ages in the Retreats and the Holy Orders. Our Light increases according to your capacity to receive, and according to your demand upon Us and the motive that is within your demand. A Master does

not always have at hand the Substance, Energy, Power, Radiation and Momentum that is required of Him by a member of the human race who is an intense and strong chela, and this requires the conscious application of a Master in the drawing forth of this power from the Great Central Sun, sometimes taking a month in order to fulfill the request.

Because the human mind and consciousness cannot conceive the fullness of that which is within the invocation, the question of time sometimes enters into their consciousness and doubt as to the possibility of the fulfillment. What you ask cannot be denied! It is not always at hand, because We are often surprised at the initiative within the lifestream, and We know where that is which is the fulfillment of anything that can be designed or invoked, and even though We must enter the Great Silence or the Sun behind the Sun, We shall not return without its fulfillment. Knowing this, proceed fearlessly, and in the firm knowledge what Jesus said "whatsoever ye ask the Father in My Name ye shall receive it" is true. Whatsoever ye may conceive and ask, ye shall receive, but even as you must build by your own energy so must We; if that which you ask is not already in form, as is sometimes the case, Our petitions rise up like your own, from Solar Lord to Solar Lord, and the answers return in like manner in rhythmic outpourings from the Throne of Grace.

CHAPTER XXV SEEK THE GOOD

It may interest you to know that the Holy Christ Self of every man determines how much or how little of the ever-present store of Good, of Courage, Faith, Light and Peace is allowed to pass through the lower bodies or personality. The Higher Self is obliged to draw the fullness of the Gifts of God through any lifestream who is seeking God's Way, seeking Truth and seeking to serve Life and his fellowman in an unselfish manner. The Holy Christ Self throws open the doors of the lower bodies to the Sweet Anointing from Above, and people are enriched without limit by the spiritual outpouring which is their strength in the hours of darkness. The Holy Christ Self, however, has the right to reject certain radiation, when the human personality makes a choice of wilfulness not in agreement with God's Plan to further selfish ends or interests. The Holy Christ Self, being all-wise and all-just, does not choose to increase the gifts of the lower bodies to pursue human interests, particularly in hours of international crisis, unless the heart is seeking God.

The Holy Christ Self of the lifestream is far more eager to give *ALL GOOD* to self than the outer self is to receive it, but as personality traits that the parent knows in the future will be held against a child until these traits can be corrected, so does the Holy Christ Self withhold certain blessings until the outer self is so determined to work with God and can never dissipate God's Good in an unseemly fashion.
